

Opportunities with CAF: train manufacture

Momentum Trains is an international consortium that has been awarded the \$1.26 billion contract for the Regional Rail Fleet project.

As part of the consortium delivering the project, CAF have responsibility for supplying the 117 new rail carriages, and the maintenance facility.

The Dubbo maintenance facility will be designed and constructed by our subcontractor, CPB Contractors and the maintenance of the trains will be managed by our other consortium partner UGL.

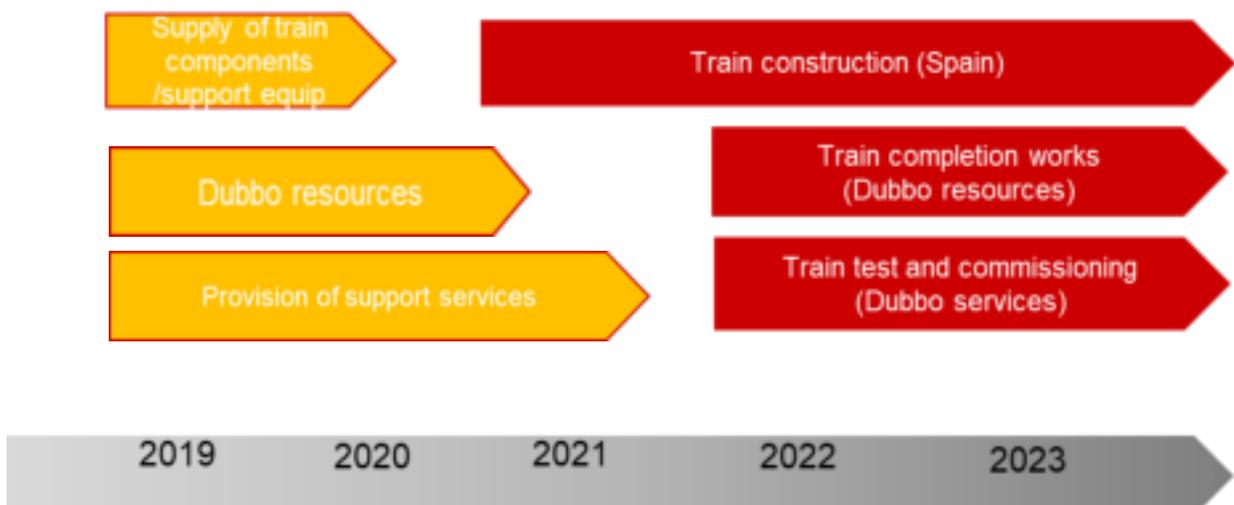

CAF is an international leader in the design, production, maintenance, overhaul and supply of subway trains, high speed trains, suburban trains, commuter trains, light rail vehicles, locomotives as well as rail system components and associated equipment.

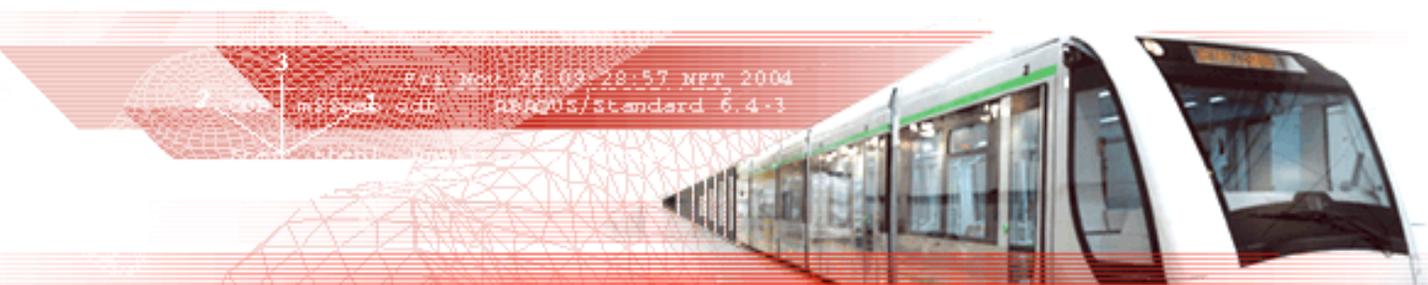

CAF rolling stock manufacturing location and timing

The new fleet will be primarily built at CAF's manufacturing base in Spain. However, a range of train completion works will be carried out at the new maintenance facility, to be built in Dubbo.

The opportunities available to businesses and suppliers to work with CAF include the supply of train components, provision of support equipment, resources and support services.

Arrows in yellow below show when the procurement process will commence and end.

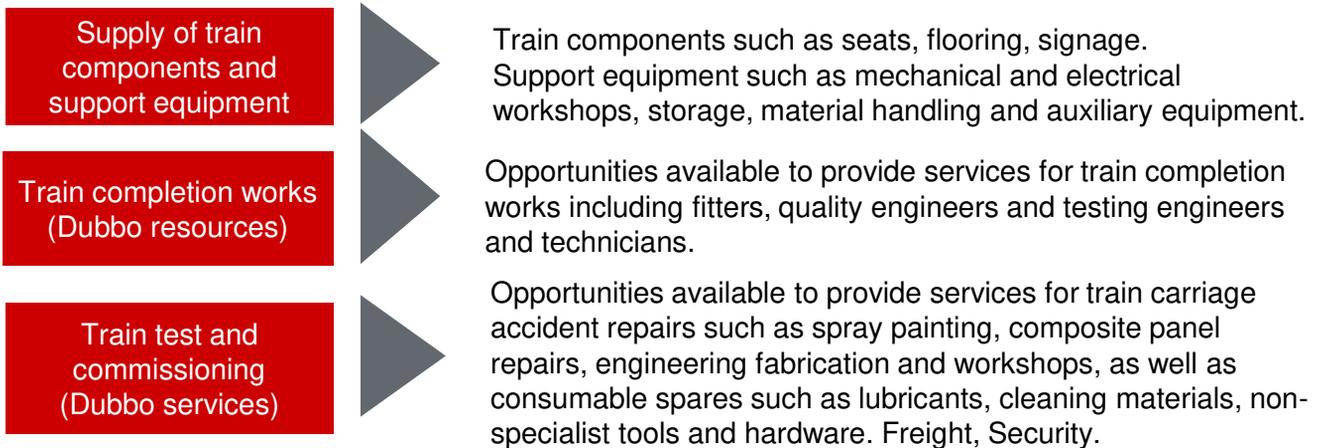

What are the opportunities with CAF?

CAF will provide a range of opportunities for local and regional businesses.

An Expression of Interest will be issued to interested businesses and suppliers in the following months.

Opportunities to get involved with CAF are provided below.

How to get involved

Please register yourself with ICN to ensure you receive the packages when they are released.

We will notify businesses and suppliers that have registered their interest.

Please visit Momentum Trains website at www.momentumtrains.com.au for further updates.

To register your interest for any opportunities with CAF please email project@momentumtrains.com.au. Please email to make an appointment with staff member at our Sydney or Dubbo project office.
